WEDNESDAY EVENING, AUGUST 30, 1882.

HINTS FOR POOR SLEEPERS .- Poor sleepers will find it advantageous often to raise the head of the bed a foot higher than the foot, and then to sleep on a tolerable thick hair pillow so as to bring the head a little months. higher than the shoulders. The object is to make the work of the brain harder so it will not throw so much. A level bed with the head almost as low as the feet causes an easy flow of blood to the brain and prevents sleep. Persons who find themself restless and unable to sleep at night would do well to place the head of the bed toward the north as it is undoubtly a great conducive to health. A hot mustard foot-bath, taken at bed-time, is beneficial in drawing the blood from the head and thus inducing sleep. Sponge the entire length of the spine with hot water for ten or fifteen minutes before retiring. This will often insure a good night's sleep. A hearty meal and a seat near a warm fire after a long walk in the cold wind will induce deep sleep in the ma-jority of persons no matter how lightly they ordinarily slumber. Active outdoor exercise and avoidance of excessive and long ontinued mental exertion are necessary in ill cases of sleeplessness. Where these neans fail such remedies as are known to liminish the amount of blood in the head should be restorted to-of course under the direction of a competent physician. Opium, choloral, etc., increase the quantity of blood in the head and are highly injurious. Their use should never be resorted to.
